Winter Snow Removal Safety Tips

All residents please be advised in order to safely provide winter maintenance services, Durham Region Non-Profit Housing Corporation kindly asks to please stay away of the parking lot area while snow clearing is in progress.

- Please do not walk in front or behind the moving snow plows or tractors.
- Please do not put the snow from between the cars into the center of the parking lot. This creates a slippery surface once the area has already been cleared of snow.
- Please do not rush to move your car while snow clearing is in progress.
- Please do not approach the to the snow plow driver. The contractor will return after the snowfall. The contractor will only clear sections where there are 2 or more adjacent empty spaces.
- Please do not park your car behind another person's car, even for a short period of time. This hinders our ability to clear snow and blocks an active fire route.
- Please do not sweep ice melt off of sidewalks. The ice melt is applied to prevent freezing and create traction for pedestrians.

Thank you for your co-operation,

Durham Region Non-Profit Housing Corporation
